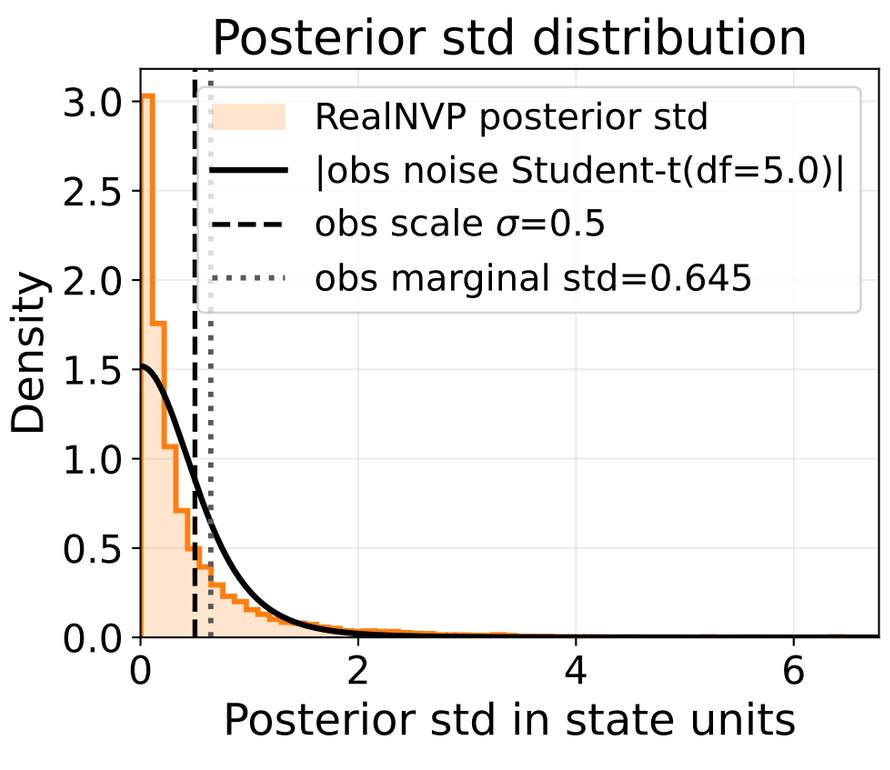
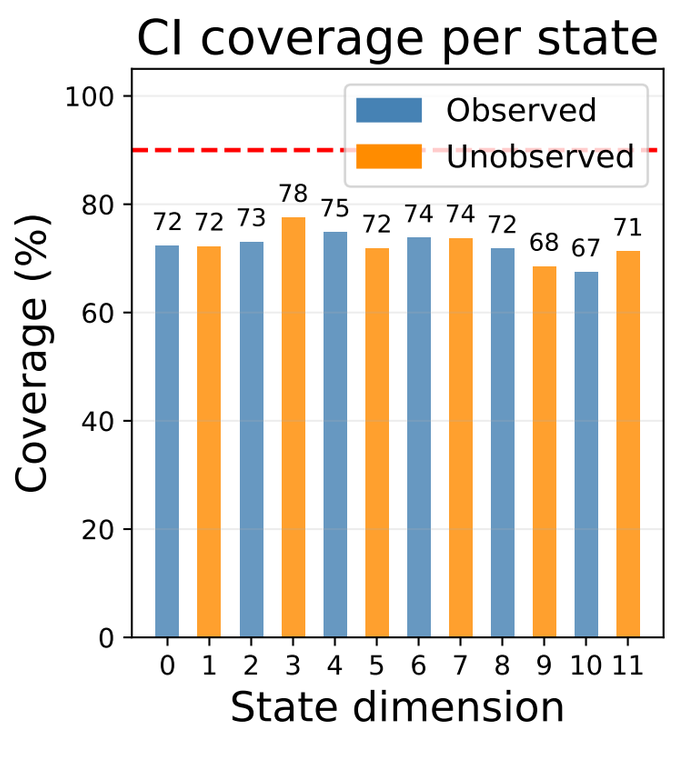
Centered posterior uncertainty
obs noise Student-t(df=5.0)
RealNVP posterior samples
Density
$(x^{(s)} - \bar{x})/\sigma_{\text{obs}}$



Posterior std distribution
RealNVP posterior std
|obs noise Student-t(df=5.0)|
obs scale σ=0.5
obs marginal std=0.645
Density
Posterior std in state units



CI coverage per state
