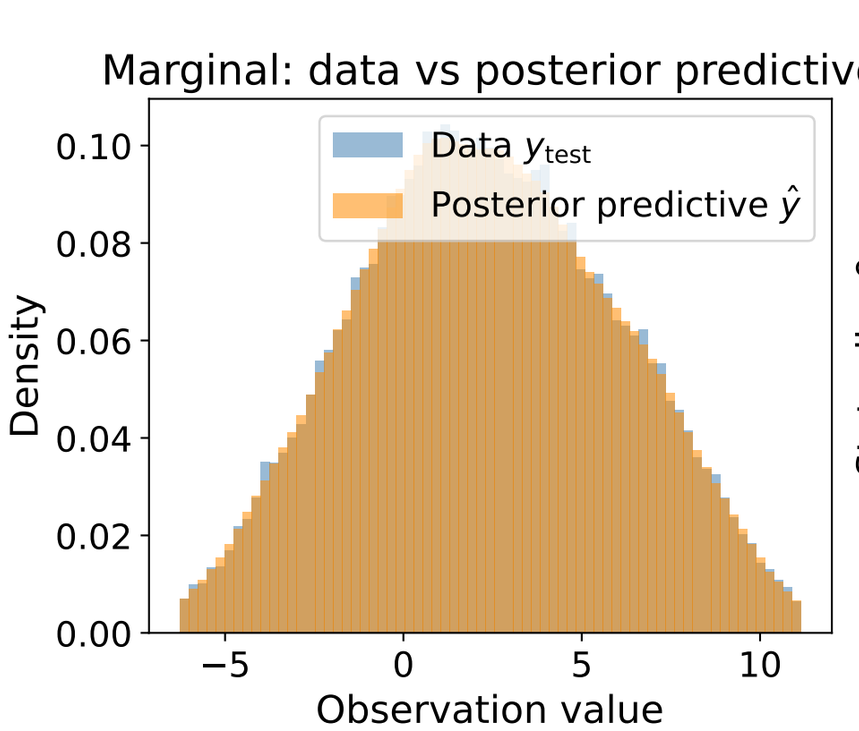
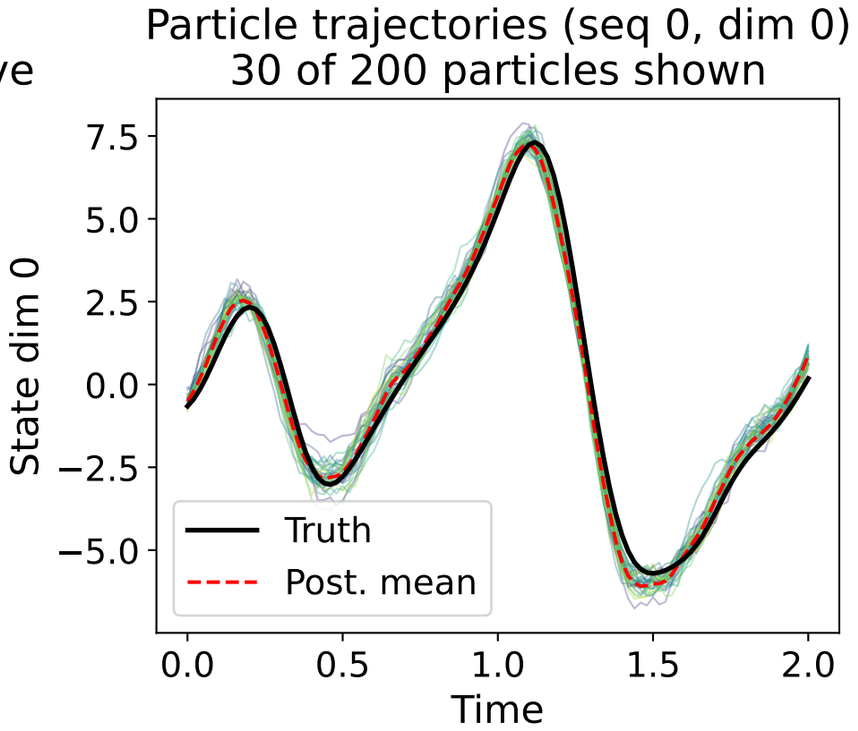
Particle distribution at t=1.00
vs ground truth
particles – dim 0 (obs)
truth – dim 0 (obs)
particles – dim 1 (unobs)
truth – dim 1 (unobs)
Density
State value at t=1.00



Marginal: data vs posterior predictive
Data $y_{\text{test}}$
Posterior predictive $\hat{y}$
Density
Observation value



Particle trajectories (seq 0, dim 0)
30 of 200 particles shown
Truth
Post. mean
State dim 0
Time
